

International Workshop on STRAIN MEASUREMENT IN EXTREME ENVIRONMENTS

Tuesday 28th August, 2012

THE UNIVERSITY OF GLASGOW, Scotland

WHO SHOULD ATTEND ?

- Researchers interested in techniques for measuring strain at very high temperatures, very high frequencies, very large displacements and, or very high speeds.
- Modellers wanting to validate predictions from simulations of strain fields for structures and components subject to extreme conditions.
- Designers/industrialists who need strain/stress data for engineering components/systems operating at the limit of material capability.
- **ANYONE INTERESTED IN CHALLENGING PROBLEMS.**

Organised by
Eann Patterson,
University of Liverpool,
John Lambros,
University of Illinois
at Urbana-Champaign

We wish to thank the following for their contribution to the success of this conference: European Office of Aerospace Research and Development, Air Force Office of Scientific Research, United States Air Force Research Laboratory
